- Operation and Maintenance of 132/33kv Grid sub station bemina, Power system network of Kashmir valley and transmission system of Srinagar area.

NIELET | INTERNET OF THINGS| Duration: 1 Month (1 Jan - 1 Feb 2019)

PROJECT HIGHLIGHTS

Crypto Tracker Using React js

- In this project i have created a cryptocurrency tracker app using React.js and Integrated CoinGecko's API to fetch real-time cryptocurrency data including prices, market capitalization, and trading volume. Designed a responsive and user-friendly interface for seamless usage across multiple devices.

Hosted Link: [Link to Crypto Tracker](#)

To-Do app Using React js

- A simple To-Do app built with React that utilizes local storage for persistent data storage. Users can add new tasks, edit existing ones, and remove completed tasks with just a click. Tasks are stored locally so they persist even after the browser is closed.

Hosted Link: [Link to React Todo App](#)

Weather app Using React js

- In this project I created a React weather app, which uses an API from openweathermap to get weather information all over the world
